

MB4S

Brand: Janome
Product Code: JNMB4S
Availability: 100

Short Description

World's First" Home-Use Four-Needle Embroidery Machine

Description

We've taken everything you love about Janome embroidery and quadrupled the capacity! With our four-needle machine, you can set up your embroidery and move on to other projects while the MB-4S gets it done. The MB-4S is built to work with most embroidery formats, including those used by industry professionals. It is compatible with six industry standard Tajima hoops, as well as the four available Janome hoops to further expand your creative opportunities.

Remote Computer Screen (RCS)

The RCS has a larger viewing area than the original MB-4. You have total set-up and editing control with up to 65,536 colours. The USB stick plugs directly into the RCS for easy design transfer.

Automatic Thread Cutter

The MB-4S automatically cuts jump threads – even between letters – saving you time and hassle.

Dedicated Bobbin Winding Motor

The independent bobbin winder allows you to wind bobbins while the machine is embroidering – a real time saver.

Embroidery Hoops

Three MB-4 hoops (included) snap in and out easily and provide the embroidery areas most often used in the industry. The MB-4 is also fully compatible with industry standard Tajima hoops.
