

Designing E4

Brand: Wilcom
Product Code: WILE4DESI
Availability: 100

Short Description

Description

With advanced lettering and team name software which includes over 200 embroidery fonts, extensive technical and creative embroidery features, and professional editing and digitizing, you can create logos, sports and fashion designs quickly with full professional control.

Easy graphics digitizing combined with very productive traditional digitizing tools provide professional digitizing for both experienced and aspiring embroiderers.

Overview

Use the new integrated Design Library to find designs in seconds by customer, order, date, stitch count and other text or parameters, all within the software.

Create and manage design digitizing requests more efficiently. New tools enhance your business productivity meaning you get more quotes and jobs through your shop each day.

Quickly prepare design mock-ups on high resolution garment images and email .PDF approval sheets directly to customers. Save basic order and job production information right into the Wilcom .EMB design file for easy reference.

Ultimate Embroidery & Multi-Decoration Software

for professional digitizers, embroidery shops, industry trainers and educators, and apparel decorators. With new technical and creative stitching effects, even faster digitizing and over 200 professional embroidery fonts, you can digitize more creative advanced designs

quickly with full professional control.

CorelDRAW® Graphics Suite is included, fully integrated and provides full vector and bitmap graphics software for multi-decoration, printing, cutting, engraving and more.

features

Advanced Integrated Design Library

Search designs in seconds by customer, order, date or any text field

Designs are automatically indexed for fast search. No manual categorization required

Browse designs from all folders in one screen, or folder by folder

Group and sort designs by customer, order, date, folder, design status, stitches and more

Quickly see recent designs by date, no matter what folder they are in

Batch operations on multiple selected designs. Open, convert, print, stitch and catalogue.

Use simple drop lists to search text from a specific field

Default “General” for the fastest and widest search results

Search by specified dates or pre-set date ranges.

3d foam

Why Update to EmbroideryStudio e4?

EmbroideryStudio e4 takes a major leap forward from the previous e3 version. With a strong focus on improving both the creative side of the software as well as business productivity through improvements in efficiency.

What's new in EmbroideryStudio e4?

Our favorite reasons to update to e4 Designing:

TrueView Thumbnails

New and Improved Digitizing

Choose between our new graphics style approach to digitizing or the improved traditional digitizing methods. There is an even more comprehensive professional control over all digitizing input values.

Bitmap to embroidery conversion

New and Improved Technical and Creative Stitching

Improved auto-underlay, Lap Corners and Tie-off stitching. New Sculpture, Raised Satin, Square and Double Square stitch types. New Spiral Fill and Radial Fill creative stitching techniques. Improved Cross Stitch copying and mirroring. *Please note: Spiral Fill and Radial Fill are part of the Spiral Fill Element paid add-on.

Interface

New Design Library

Powerful design management capabilities with high speed search for customer designs, all within the software. Find by customer, order, date or any design information. This feature replaces the aged Design Explorer.

Embroidery Outlines

Order Job Feature

Save customer, order & job details directly into the .EMB design file. Create design workflows and manage design requests, estimates, customer approvals and production worksheets all within the software. A separate database is not required.

CorelDRAW x6

CorelDRAW® Graphics Suite X8 INCLUDED

Fully integrated and bundled within the software. There are many new and improved Corel features specifically relevant to embroidery, multi-decoration, printing, cutting and engraving. It includes an extensive clipart and font library. Easy to install and Windows 10 compatible.

Break a Part Embroidery Font

Enhanced Product Visualizer

New high-resolution garment images can be used to create accurate order mock-ups. Resize, re-color and save directly into the .EMB design file. Print new PDF approval sheets with all the job details or email them directly to customers.

Virtual Decorations

New and Improved Lettering

The world class Wilcom lettering got even better plus there are 25 NEW professionally digitized fonts too! Now with Unicode support and OpenType Glyphs for fancy lettering. New 3D foam, outline, running stitch and two color fonts. There is also an improved font management and Team Names feature.

Improved Auto-Digitizing

Greatly improved image processing and vector auto-digitizing capabilities for commercial use. Generate automatic stitch counts for quotations and job estimates. Simple logo designs can be auto-digitized and edited instead of outsourcing.

Enhanced Monogramming

New easy to use monogramming interface with 69 professional predefined monogram designs, or create your own. Take greater control of your monogram letter sizing, spacing and stitching.

More Efficient Design Workspace

Switch between multiple open designs effortlessly with the new design tabs. An improved arrangement of toolbox tools with quick-access flyouts helps you work faster. Visualize stitching sequences with the new Stitch Player using classic media player controls. New Color toolbar commands and My Threads docker for easier color management. Support for 4K monitors with optional large or small icons.

EmbroideryStudio e4 – Update e4.1

Update e4.1 for EmbroideryStudio e4 is packed with new features and enhancements. We have created a brief overview to a selection to give you a taste of what you could look to experience.

Please note: The videos will display if the feature is available as standard or as a paid add-on Element as well as which versions of EmbroideryStudio e4 they may be used.
