

MB-7

Brand: Janome
Product Code: JNMB7
Availability: 100

Short Description

World's First" home-use seven-needle embroidery machine.

Description

The MB-7 is the perfect tool to help you conquer your next embroidery project. This innovative machine is built to work with embroidery formats used by industry professionals such as .jef+, .jef and .dst. With 50 built-in embroidery designs and 10 fonts for monogramming, a USB port to easily import designs and a maximum speed of 800 SPM, the possibilities are endless. All embroidery operations are noticeably faster and smoother on the MB-7. It is compact, lightweight and portable.

7 Needles and Multi Lighting

With more needles, more thread can be set at one time. Therefore, the time required for thread exchange is reduced and work efficiency is improved. Plus there are 4 white LED lights to illuminate the hoop area.

Remote Computer Screen (RCS)

The RCS unit has an LCD colour touch screen with a large view area. There is a USB slot on the side for USB Stick and PC connection. The RCS attaches to the MB-7 or is free standing. In conjunction with Janome digitizer MBX you can run up to 3 x MB-7 machines simultaneously and all 3 machines can be embroidering different designs.

Embroidery Hoops

Three MB-7 hoops (3 included) snap in and out easily and provide the embroidery areas most often used in the industry. The MB-7 is also fully compatible with industry standard Tajima hoops.

Sub-Control Panel

Built onto the side of the machine, the sub-control panel allows the MB-7 to be fully functional without the RCS unit attached.
